

DYLAN MOONEY

Glasgow, Scotland · dylan@dylanmooney.co.uk · 07852790695 · dylanmooney.co.uk

EDUCATION

University of the West of Scotland BSc (Hons) Web & Mobile Development - 1st Class Honours	Paisley, Scotland September 2020 - Present
City of Glasgow College HND Web Development	Glasgow, Scotland August 2018 - July 2020
New College Lanarkshire HNC Sound Production	Coatbridge, Scotland August 2014 - July 2016

WORK EXPERIENCE

Freelance Web Developer Glasgow, Scotland
Connecting Scotland - connectingscotland.org April 2020 - September 2020

- Directed meetings with clients in order to identify and establish requirements to create a realistic project brief that satisfied all parties.
- Overhauled and rejuvenated website to a more modern, and accessible solution. Improved site score through improving performance (caching, minification, CDN's) and following web development best practices (usability, accessibility, SSL).
- Performed routine maintenance work while also providing guidance and recommendations regarding client requests.

Asda Coatbridge, Scotland
Counters Assistant August 2017 - Jan 2018

- Provided a high level of customer service, ensuring all customers were treated with respect.
- Coordinated and distributed tasks with colleagues to ensure target deadlines were met.

John G Russell Coatbridge, Scotland
Administrative Assistant 2014 - 2015

- Contributed to day-to-day operations and provided administrative support for multiple departments.
- Accurately input data into the administrative system within the required timetable.

TECHNICAL SKILLS

Languages:	JavaScript, PHP, SQL, HTML, CSS, SCSS, JSON
Frameworks & Libraries:	React, Redux, Node.js, Express.js, Laravel, Tailwind
Tools:	VSCode, Git, Linux, Digital Ocean, Google Developer Tools

PROJECTS

AnimalSnap *React, Redux, Chakra UI, Mapbox* animal-snap.vercel.app
Prototype PWA that facilitates the tracking and conservation of local wildlife by allowing users to snap pictures of animals with their recent location and status. Features a modern user interface, offline persistent storage, and access to native device APIs (Camera, Location).

National Museum of Scotland *React, Node.js, Express.js, MongoDB* dmnmse.herokuapp.com
MERN application for booking museum tickets. Features modern, responsive frontend with event filter and booking system that is connected to an API that handles user authentication, event booking, mock payment processing and PDF ticket generation.

SimpleCMS *Laravel, Alpine.js, Tailwind, MySQL* github.com/dylanmooney/simple-cms
A barebones, minimalistic content management system built with Laravel and MySQL. Features a WYSIWYG editor, user authentication/authorisation, image upload, and admin dashboard.

PERSONAL DEVELOPMENT

Self-study August 2017 - Present
While working at Asda I decided to teach myself programming as a hobby with online courses. Through this I got accepted into a competitive college course that subsequently led to me pursuing and achieving a degree in Web & Mobile Development. In addition to undertaking online courses, I supplement my learning through reading, building personal projects and experimenting with the new technologies, techniques and approaches being adopted within the industry.
